## Cloud Computing

Cloud computing provides numerous benefits for businesses that operate with vehicle fleets, including increased scalability, cost-effectiveness, and flexibility.

## Fixed Rate Pricing

Fixed rate pricing for our Cloud Solution, with no hidden fees or surprises, making it easy for businesses to budget and plan for their fleet management needs without worrying about unexpected costs.

## Docker Compatible

Flexibility and scalability to integrate the platform with existing tools and workflows, ensuring a seamless and efficient experience for managing fleets, regardless of unique requirements and preferences.

## Flexible cloud usage

## HOW AUTOPI CLOUD WORKS

AutoPi Cloud is a comprehensive management service provides a range of tools and features to businesses who work with vehicle fleets. With AutoPi Cloud, you can set up and manage data flows for your fleets, allowing you to collect, process, and analyze valuable data from your vehicles.

### Standard Setup

The Standard Setup is the easiest and most common way to set up data flows in AutoPi Cloud: Connect an AutoPi device to the vehicle's OBD-II port and configure it to send data to the cloud.

### Custom Data Endpoint

For businesses who require more control over their data flows, AutoPi Cloud offers a Custom Data Endpoint setup: Define custom endpoints for data collection and send data to third-party services or local servers.

### Dual Stream Data

Dual Stream Data is a unique setup that allows businesses to stream two sets of data simultaneously: Stream real-time data from both the vehicle's OBD-II port and the AutoPi device's internal sensors.

### Custom OS

For businesses who require complete control over the software running on their AutoPi device, AutoPi Cloud offers a Custom OS setup: Replace the default AutoPi OS with a custom operating system to integrate custom software and tools.

## Cloud Solution

Scalable and flexible platform for managing vehicle fleets remotely, including a risk-free opportunity to test the platform with up to 3 devices per company, and the option to use the service for as long as needed.

## One-time Fee Branding

Customize the platform to match brand identity, helping to reinforce brand message and enhance marketing efforts with fleet management customers, all without any recurring costs or additional fees.

## Dedicated Cloud Environment

Ensuring maximum security and reliability for managing fleets, with customizable access controls and data encryption options, giving businesses the peace of mind, they need to focus on what matters most - growing and optimizing their fleet operations.
